**AEROBATIC PERFORMER ROB HARRISON –  
THE TUMBLING BEAR RARELY UPRIGHT**

That Rob Harrison would be popping in and out of puffs of white smoke, spinning, diving and twisting through the air in a specially built monoplane, repeatedly contorting his body to resist up to eight times his body weight in pressure, was unthinkable on that first flight.

Then, his Dad, a career Naval officer, was at the controls of a Piper Cub, and 6-year-old Rob was scared.

Now, nearly six decades later, the Claremont, CA resident, better known in airshow circles as “The Tumbling Bear,” remembers that first flight. Remembers, sure; dwells upon it, no.

That’s typical. This is a guy who rarely looks back, always forward.

There’s the next show, the next new move, the next generation he hopes to pass along his positive attitudes on experimentation and achievement.

Fear is also a distant memory.

There’s no place for it now, not with the massive rush of adrenaline that accompanies each

flight, the intense concentration required to complete each move, and the enormous physical pressure while airborne.

Besides, he says, “Fear is the enemy of safety.”

The Tumbling Bear, all 6-foot and 250 pounds of him, has been a marquee airshow attraction since 1993 when he made the decision to embark on a new career after 28 years with the United States Forest Service, where he was responsible for the technical aspects of firefighting airplanes and helicopters.

The rarely-seen tumbles and gyrations of his bright yellow Zlin 50LX are now his trademark in the sky. The maneuvers are best described as gyroscopic, created by the gyroscopic effect of the engine and propeller.

An abrupt maneuver in one direction causes a force in a different direction. The plane isn’t actually flying; the combination of aerodynamic and gyroscopic forces is what causes the plane to turn and tumble as it does.

None are more enthralled with his airborne acrobatics than the kids; in turn, their reactions seem to give Harrison the most enjoyment.

Wherever the show, he typically is surrounded by youngsters after touching down and responds as would a flying Santa Claus, passing out collector cards, pins, washable tattoos and other personalized giveaways. He signs Tumbling Bear coloring pages downloaded from his Web site, signs whatever else is requested, poses for every photo, answers every question and makes each youngster feel special.

He minces no words when discussion turns to how society today is treating its young.

“I think we’ve made a mistake in depriving our youth of the ability to do darn near anything,” he says. “I hope that by watching our show and talking with me about what I do in the sky they learn not what *can’t* be done, but what *can* be done.

“We need to give young people positive information and example, which in turn builds their confidence and willingness to experiment. That’s how kids find their special talents. We can’t be holding them back from such discovery.”

The Tumbling Bear is a show manager’s dream. He aggressively promotes whatever is next on the calendar. He is media-savvy, colorful and candid.

Moreover, he makes one vow to organizers who hire him.

“Most acts cost you money,” he says. “But we make you money.”

His 12-minute routine is taxing; two a day are exhausting. He repeatedly uses all his strength to brace his body (“straining inward” is how he describes it) against up to a ton of pressure in order to maintain sufficient blood flow to the head.

This is an athletic endeavor. His self-created practice schedule has him in the air 3-4 times a week, 45 minutes at a time. Those sessions, along with performances, have resulted in strong, defined leg muscles and a taut midsection. Harrison is a big man, but he’s no doughboy.

To reach this point he achieved repeatedly in the classroom and in the air.

He earned a B.S. in Mechanical Engineering at Oregon State and a law degree from La Verne (CA) University. He added a certificate in flight test engineering from the University of Tennessee Space Institute and an FAA Statement of Aerobatic Competency, which allows him a waiver for unrestricted aerobatics.

He is also an Aerobatic Competency Examiner, or ACE. This puts him in select company. “There might be 100 active ACES who are allowed to license others to perform in airshows,” Harrison explains.

Then there were the 28 years as an engineer for the USFS.

All along, The Tumbling Bear was incubating. When the challenge of performing in airshows beckoned in the early 1990s, Harrison, with the support of his late wife Kathleen, knew where he wanted to go, and how he wanted to get there.

The vehicle was the Zlin 50LX, designed in the Czech Republic to compete in European and World Championship flying competitions. Aided by a U.S.-made engine, the Zlin repeatedly defeated all comers in the 1970s and 80s.

Harrison traveled to the Czech Republic, graduated from the Zlin Air School’s advanced aerobatics school, and ordered his own edition of the plane.

The Zlin 50LX came in a box – assembly required. No problem. From first bolt to electrical systems, this has been Harrison’s baby.

And so The Tumbling Bear took to the skies, reaching for new goals and seeking new thrills, discovering again what he *could* do.

Rob has five children and eight grandchildren. In 2006, he married Susan, a private pilot herself and Rob's right hand in the hangar and on the flightline. Susan preflights the plane and sends Rob off with a kiss before each airshow flight. For a wedding gift, Rob gave Susan a Zlin 526L and he's teaching her aerobatics.

During airshows, people often ask Susan "how can you stand there and smile while he's performing such extreme routines?", and she says, "Because I love it and I like training with Rob, too! He is an incredibly talented pilot and I respect what he does." Susan earned her pilot's license 17 years ago, and has flown and owned many types of planes. Between them, the couple shamelessly own six airplanes. At one point, they were up to nine airplanes.

"It's a myth that you lose either strength or coordination as you grow older," he protests. "Some of the better pilots are older. I mean, I recently watched an 83-year-old guy fly a great airshow routine. No matter your age, you can still be fit."

It's no use. After all, that would be giving in to what *can't* be done.

*Targeting the future of aviation.*

## **FOR IMMEDIATE RELEASE**

Contacts: Rob Harrison or Susan Newman-Harrison

Phone: 909.626.7442

## **THE TUMBLING BEAR AND KIDS – A SPECIAL RELATIONSHIP**

Mouths agape, necks craning, eyes squinting, fingers pointing ... the youngsters are having a ball and The Tumbling Bear, aka Rob Harrison, is thrilling them all.

The younger set is completely entranced when The Tumbling Bear – and isn't that name a natural hit with kids – loops, tumbles, and performs other complicated maneuvers through the blue sky, his bright yellow plane standing out in the brilliance of nature.

The Tumbling Bear is no silent flyer; Harrison entertains with constant patter to advise of his next move, effectively setting the stage for more youthful amazement.

“As a grandpa, I love little kids and I understand how excited they can be, especially about airplanes. My eight grandkids, from the time they were tiny, were always thrilled when they saw grandpa with the yellow plane,” said Rob.

Nor is the show over when The Tumbling Bear emerges from the cockpit at the flight's conclusion. In fact, the entertainment value of the appearance may, if anything, ratchet up a notch.

Kids (of all ages; “big kids” are welcome!) naturally gravitate to The Tumbling Bear, who cheerfully distributes premium items that include autographed Tumbling Bear collector cards and

washable tattoos of the Zlin aircraft and Tumbling Bear name.

He stays until every picture is taken, every autograph is signed, every question is answered. On the ground or in the air, the connection with the audience is strong.

In fact, the connection is always present thanks to the youth-oriented content on his Web site, [www.harrisonairshows.com](http://www.harrisonairshows.com). The Tumbling Bear supplies a word search, coloring pages, a maze and more, all of which can be downloaded and brought to shows to be signed by Harrison.

Young people can spot a phony a mile away ... The Tumbling Bear earns their trust by proving what is real in the sky is approachable and, excuse the pun, down-to-earth on the ground. And that's all the kids ask.

Why the special relationship with youth? It's a serious question, and one that the usually jovial Tumbling Bear ponders carefully before answering.

"I think we've made a mistake in depriving our youth of the ability to do darn near anything," he says. "I hope that by watching our show and talking with me about what I do in the sky, they learn not what can't be done, but what can be done.

"We need to give young people positive information and example, which in turn builds their confidence and willingness to experiment. And that's how kids find their special talents. We can't be holding them back from such discovery."

## AIRCRAFT FACT SHEET

Pilot:	Rob Harrison
Aircraft:	N6660K Zlin 50LX — manufactured in the Czech Republic and powered by an experimental, Lycoming-based engine developed by Performance Aircraft.
Horsepower:	340+
Top speed:	250+ mph
Wingspan:	28 feet, one inch
Length:	21 feet, eight inches
Height:	6 feet, 8 inches
Gross Weight:	1,600 pounds fully loaded; 1,250 pounds empty
Flight ceiling:	20,000 feet
Operating load limits:	Very high
Notable:	This model Zlin won several world championships between 1976-1985.

## ROB HARRISON BIO

**Born:** May 26, 1941  
**Birthplace:** Honolulu, HI  
**First flight:** Age 6, with father in a Piper Cub  
**Education:** B.S. in Mechanical Engineering from Oregon State University; J.D. (law degree) from La Verne (CA) University; has done graduate work at UCLA; attended U.S. Navy Test Pilot School Certificate in Flight Test Engineering from the University of Tennessee Space Institute; FAA Statement of Aerobatic Competency, Level I (waiver) for unrestricted aerobatics; Aerobatic Competency Examiner (ACE); licensed attorney Engineer with United States Forest Service for 28 years. Much of this time based in San Dimas, CA as aviation program leader for USFS, in charge of technical aspects of firefighting airplanes and helicopters.

**Professional achievements:**

**Employment:** Owner of Murphy & Harrison, Inc.  
Engineer, Lawyer, Pilot

**Number of performances (through 2007):** 300+

**City of residence:** Claremont, CA

**Family:** Wife/pilot/promoter/hangar assistant/flightline crew Susan Newman-Harrison; Daughters Janie and Laura, both of Portland, OR; daughter Lisa of VT; son Kent, lieutenant commander in the U.S. Navy currently stationed at Monterey, CA; son Michael of Silicon Valley, CA; eight grandchildren
